

## La Luz Elementary School

### Goal 1 - Academic Excellence

The Albuquerque Public Schools Board of Education and our superintendent set eight goals in the 2008-09 school year. Goal One focuses on academic improvement. In addition to district targets, each school has similar targets for each of the areas in Goal One. An important part of these goals is keeping the public informed of our progress. This individual school report provides you with baseline data and three years of targets for this school.

**Strategic Objective I** - Increase the percentage of students who are proficient on the state Standards Based Assessment.

If the 2010 target was met new targets were calculated for 2011 and 2012 based on 2010 achievement. If the 2010 target was not met the targets calculated based on 2009 achievement remain in place.
