FOR THE TEACHER

1. Students may need help to read and interpret each question.
2. Use the table below to record the results.

CONTENT STANDARD	LEARNING TARGET	QUESTION
K.OA.2	Represent and solve subtraction word problems	3. <input style="width: 40px; height: 25px;" type="text"/>
K.OA.3	Identify combinations that equal a number up to 10	1. <input style="width: 40px; height: 25px;" type="text"/>
K.OA.4	Identify combinations that make 10	4. <input style="width: 40px; height: 25px;" type="text"/>
K.OA.5	Add within 5	2. <input style="width: 40px; height: 25px;" type="text"/>
K.G.4	Describe features of 2D shapes	5. <input style="width: 40px; height: 25px;" type="text"/>
	Describe features of 3D objects	6. <input style="width: 40px; height: 25px;" type="text"/>

1. Draw ● to make the balance picture true. Then write the addition sentence to match.

$$\boxed{3} + \boxed{6} = \boxed{9}$$

2. Color the stars. Then write a matching addition sentence.

a. Color 3 stars.

$$\boxed{3} + \boxed{2} = \boxed{5}$$

b. Color 4 stars.

$$\boxed{4} + \boxed{1} = \boxed{5}$$

3. Read the story.
Write a matching subtraction sentence.
You can draw a picture to help.

5 frogs in a pond.
2 jump away.
How many frogs are left?

$$\boxed{5} \text{ take } \boxed{2} = \boxed{3}$$

4. Draw more dots to make 10.
Then complete the matching addition sentence.

a.

$$\boxed{8} + \boxed{2} = \boxed{10}$$

b.

$$\boxed{3} + \boxed{7} = \boxed{10}$$

5. Look at the shape. Write the number of sides and corners.

5

sides

5

corners

6. Look at the objects. Loop the object that has only flat surfaces.
