### Connecting Your Students to Work-Based Learning Experiences

Developing a career pathway and gaining on-the-job experience is critical to the future success of New Mexico's students and our workforce talent pipeline.

Some of the most important decisions our youth will have to make involve their education, occupation and job. Experience in the workplace during middle, high school and college will not only empower them to make sound choices but also give them the opportunity to apply what they are learning in the classroom.

Are you interested in pointing your students to resources that will help them with their future job success and career pathway development?

### HOST MOCK INTERVIEWS

The goal of mock interviews is to provide students with the opportunity to enhance their soft skills, and to help reduce the stress and anxiety that may surround a young person during their first interview, whether it's for college or a career. This opportunity allows employers to provide industry-specific insight to students and postdocs to strengthen their candidacy within your field. Students will receive valuable feedback on what they are doing well and areas that they need to improve.
