

APS . . . to the Point

The APS Facilities Design + Construction Division has built **37** LEED projects since 2010, more than any other public entity in the state!

The non-profit U.S. Green Building Council (USGBC) developed the Leadership in Energy and Environmental Design (LEED) certification to encourage healthy design and construction of energy and resources-efficient buildings.

Certifications include:

19 Gold
1 Certified
17 Silver

The **7** most recent (2016-17) certifications include the three represented here:

McKinley Middle School classroom addition

Reginald Chavez Elementary School kindergarten/classroom addition

Ernie Pyle Middle School classroom addition

LEED construction projects have totalled **\$223 million** to date.

The LEED design and certification costs is a mere **0.8%** of total of total construction costs.
