IV. SPECIFICATIONS

4.0 Overview

This section contains the mandatory and desirable specifications as well as related information. Offerors must respond to the mandatory specifications and should respond to the desirable specifications of this RFP providing the required responses, documentation, or assurances, and complete the Offeror Cost Response Form attached as Appendix D. Failure to respond to a desirable requirement will result in zero (0) points being awarded for that specification.

4.1 Information

The scope of work shall consist of providing communication services through the provision of qualified staff and appropriate resources to assist in all aspects as listed below

This work shall include one or more of the following Areas of Works:

Area 1 – Data Circuits

Area 2 – Internet Access

Area 3 – Basic Voice Services

Area 4 – Advanced Voice Services

The work associated with each of these areas of work is described in 4.4 below. **Offerors are encouraged to bid on any of the individual Area(s) of Work or all Areas of Work.** If the Offeror proposes to perform less than all requested Areas of Work, this must be clearly delineated, and the Offeror must clearly state that work which it does not propose to undertake. APS may award contracts covering one or more Areas of Work to different Finalists Offerors. Please explain how you would interact with other Contractors to ensure the seamless provision of services.

4.1.1 Funding

Funding will be made available through the Technology Department, site, school, and/or charter school; however, funding is contingent upon state and federal appropriations.

4.1.2 Agency Resources/Facilities Provided

The Chief Information Officer or designee will **NOT** provide work space for these communication services (data circuits, internet access, basic voice and advanced voice services). The Contractor(s) providing service under this RFP shall be responsible for the furnishing of facilities/workspace and associated furnishings, utilities, and equipment at their place of business.

APS personnel involvement does not relieve the contractor of the responsibility of providing the required support for communication services.

The Chief Information Officer or designee will be the primary contact and may coordinate these communication services (data circuits, internet access, basic voice and advanced voice services) for

other sites, schools, and/or charter schools with the Contractor.

4.1.3 Work Performance

For the purpose of preparing proposals, Offerors are to assume that on-site work will be performed at various APS sites, schools, and/or charter schools in Albuquerque, Corrales, Tijeras, and Sandia Park, New Mexico. Contractor's management staff may be expected to complete a fingerprint and background check if project is located at a school or charter school.

4.2 Scope of Work

The Technology Department is the owner requiring the work. However, each department, school, or charter school may require data circuits, internet access, basic voice services, or advanced voice services as needed.

4.3 Scope of Procurement

The scope of procurement shall encompass the defined Scope of Work in this RFP. The contract schedule is to be determined after award of contract, and upon receiving all required approvals, whichever is later for a term of one year. The contract may be extended for up to four (4) additional one (1) year periods, or any portion thereof at the discretion of APS, pursuant to funding availability and satisfactory service provision, as determined by APS. In no circumstance shall the contract exceed a total of five (5) years in duration. The district may opt to enter into a multi-year contract that is contingent upon adequate appropriations. Regardless of any termination date, any services still in progress will be carried to successful conclusion but without unduly prolonging the process. This procurement may result in multiple awards.

Although this contract is being bid on behalf of the Technology Department, individual schools or departments, state agencies or local public bodies will be referred to the successful Contractor in the event of requirements that can be adapted to the specific items awarded.

4.4 Technical Specifications

The Technology Department of the Albuquerque Public Schools is requesting proposals for telecommunications services. The intent of this proposal is to select a contractor to provide these communications services for the district with service beginning as of July 1, 2014. It is anticipated that this award will be eligible for federal E-Rate funding. Some of the existing services are currently under contract with various vendors and those contracts will not expire by July 1, 2014. Transition period must be seamless to APS with no disruption of function or service level. Offerors may propose any one, or more, or in a combination of these services.

During the life of this contract, APS may seek to improve communications services and reduce operational costs by implementing new technologies and adding facility locations. These changes may include moving from analog and digital voice services to voice over IP (VoIP) technology, centralizing voice services and reducing the number of lines at each school/facility site, increasing data circuit bandwidth provided to each school/facility to support video streaming technologies, implementation of a disaster recovery site at a remote location, and incorporating wireless broadband to provide additional services for load balancing and business continuity.

APS intends to seek federal E-rate discounts for all eligible services. To be eligible for support, Telecommunications Services must be provided by a telecommunications carrier, that is, a company that offers telecommunications services on a common carriage basis. A telecommunications service is “the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public...” [47 U.S.C. 153(46)]. Telecommunications is defined as “the transmission, between or among points specified by the user, of information of the user’s choosing, without change in the form or content of the information as sent and received” [47 U.S.C. 153(43)]. All telecommunications carriers are required under FCC rules to be common carriers and to file FCC Form 499A (Telecommunications Reporting Worksheet). A service provider that is eligible to provide telecommunications services for E-rate discounts will have a “Y” under “Form 499 Filer” for its SPIN in the “SPIN Contact Search” on the SLD Web site.

In preparation of proposals, Offerors are encouraged to present “other processes, solutions, and/or guidelines” to address the minimum types of key services and elements described in the Scope of Work for data circuits, internet access, basic and advanced voice services as needed by the district.

The following describes current services. We are looking for something that is equivalent or better to provide required data and voice communications services to APS facilities. Appendix J provides a listing of the various locations and the services currently being deployed at those locations.

Data Services

- Broadband data communications over copper or fiber at speeds from 30-Mbps to 10-Gbps.
- It is the district’s desire to receive its WAN Connectivity from one vendor, so strong preference will be given to any vendor that can provide services to all district locations as of July 1, 2014.
- Current network configuration is a “two hub and spoke” arrangement with connections from each school/facility to the data center and administrative service center (930 Oak SE and 6400 Uptown NE). Load balancing occurs between the two hub locations.
- The optimal solution will be a “two hub and spoke” arrangement. One of the “hubs” must be 930 Oak SE and the district prefers that the second hub provide the following features:
 - Fully redundant power and comprehensive fire suppression.
 - Generator backup in case of power failure.
 - Controlled access, using biometric readers and card scanners, to prevent unauthorized access.
 - Climate control to ensure equipment is maintained at temperatures recommended by the manufacturer.
 - The district desires a minimum of one rack with the ability to increase to three to five racks over the next two years. The racks must be in a caged off area that are only accessible by APS authorized personnel.
- If prospective bidders are unable to provide co-location space in Albuquerque the 6400 Uptown NE location can be used, but it is not ideal. Preference will be given to those solutions that do not utilize the 6400 Uptown NE location.
- Elementary schools are currently connected at 100-Mbps at 88 locations and 30-Mbps at one location.

- Middle schools are currently connected at 100-Mbps at 27 locations
- High schools are currently connected at 200-Mbps at 16 locations
- Over the life of the contract the district desires the ability to increase the speed of each location to a possible maximum of 10 Gbps.
- Please visit www.aps.edu/schools for a complete listing of all schools

Internet Access Services

- Internet access services are currently installed only at the district's data center and main administrative office (930 Oak SE and 6400 Uptown NE). Current Internet connection speed is 2-Gbps from each hub.
- It is the district's desire to receive its Internet access from one vendor, so preference will be given to any vendor that can provide services by July 1, 2014.
- Internet access connectivity must be provided to the two hub locations as explained in the Data Services section.
- Over the life of the contract the district desires the ability to increase the Internet access speed up to a maximum of 10 Gbps per "hub."

Voice Services (local and long distance)

- Current voice services being bid include: 1FB lines, Centrex Line, and Voice Grade Circuits.
- It is the district's desire to receive its Voice Services from one vendor, so preference will be given to any vendor that can provide services to all district locations as of July 1, 2014.
- The district desires the ability to migrate some of its 1FB lines to LMB lines.
- Additionally some of the existing 1FB lines may be transitioned over to the ISDN circuits also being bid on this RFP.

Advanced Voice Services (ISDN)

- 12 ISDN Circuits and 500 Individual Telephone Numbers each at the district's data center and main administrative office (or the second hub location).

V. EVALUATION

5.0 Overview

The following paragraphs of this section describe the method of evaluating Offerors proposal(s). **FAILURE TO COMPLY WITH A MANDATORY SPECIFICATION WILL RESULT IN DISQUALIFICATION OF THE PROPOSAL!**

5.0.1 PROPOSAL EVALUATION CRITERIA

The following criteria should be addressed with regard to each of the Areas of Work for which Offeror is submitting a proposal. The Offerors' response to these criteria will form the basis of the points awarded in the review of proposals.

Each Area of Work will be scored separately. A total of 100 points may be awarded with regard to each Area of Work. Thus, the total possible points for each Area of Work are as follows:

Area 1 – Data Circuits.....	100
Area 2 – Internet Access.....	100
Area 3 – Basic Voice Services.....	100
Area 4 – Advanced Voice Services.....	100

APS reserves the right to make a either a single or multiple award contract(s) for all Areas of Work or, in any combination for each specific area of work alternatively, award Contracts covering one or more Areas of Work to different Finalist Offerors, whichever is deemed to be in the best interests of APS. There may be more than one Contract award for each specific Area of Work. No points will be awarded for an Offeror's ability to bundle services. The Finalist Offeror with the highest combined score for all Areas of Work may not necessarily be awarded a contract for all Areas of Work if it is determined that it is in the best interest of APS to make awards to multiple Finalists Offerors involving less than all Areas of Work.

5.1 Evaluation Points Summary

The following is a summary of evaluation factors and the maximum point values assigned to each. These will be used in the evaluation of each Offeror proposal submitted. Firm C	3rd (= 3)

A tie for first, at the end of the final rankings after completion of evaluation of proposals shall be broken by separate ranking by the committee members, only ranking the firms involved in the tie. OFFEROR NAME _____

The Offeror listed on Page 34 and 35 and submits the following costs not including New Mexico Gross Receipts Tax for Communications Services for data circuits, internet access, basic and advanced voice services to complete the requirements as outlined in this RFP for the Albuquerque Public Schools Technology Department.

Include any regulatory restrictions on provisioning or pricing of services (tariff, non-tariff services, or limited availability in geographic areas around Albuquerque). Include a chart showing bandwidth and monthly cost for all circuits (by type/speed if no distance charges). Descriptive data and literature may be included.

Discuss on a separate page how your costs are derived. Is it based on tariff or by other means? How will price increases/decreases be established? Note that APS requires the option of E-Rate discounted billing. Clearly identify items that are eligible for E-Rate and any that are not.

Clearly specify pricing differences for one-time cost as well as recurring costs exclusive of tax. If you do not choose to respond to all options, this will not disqualify your bid. Please be very specific as to your offer.

Points for cost will be determined on the cost for each category. Pricing may be provided for a wider range of bandwidths/services. However, prices **MUST** be provided for the bandwidths/services requested below.

Cost Proposal(s) must be submitted in Volume #2 only and identified with the Offeror's name and "COST PROPOSAL". Your proposal may be considered non-responsive if not submitted in Volume 2.
