DECIDING TO USE EDGENUITY

Guide to this site:

This site is designed to give you some information about Edgenuity courses prior to opting to teach the course for this school year. The elementary and secondary curriculum are significantly different as the k-5 program is a recent purchase from Accelerate Education. The curriculum for each course is complete and designed to be sequential. It can be taught in a face-to-face or hybrid setting as well as for distance learning. Additional synchronous activities or resources can be added but material cannot be removed from the course without affecting the course integrity.

Students with IEPs should be carefully considered on an individual basis to determine if this is the best method for delivery of instruction.
